

Table 7: Table containing experiments - Ex. is the experiment's number, Ag0 type is the studied agents type, Ags Type is the type of others agents in simulation, Env. is the type of environment, Rec/Day is the resources quantity that is preceded per day, Cons. is the days number that an agent can survive without consume a resource, Av. SI is the average of iterations that an agent survived, Min. SI is the minimal iterations that an agent survived, Max. SI is the maximal iterations that an agent survived, Dev. is the deviation, Av. OCEAN are the values of OCEAN weights, Dev. OCEAN are the Values of OCEAN weights deviation and Sum. Dev. is the sum of agent weight deviation

Ex.	Ag0 Type	Ags Typ	Env.	Rec/Day	Cons.	AV. SI	Min. SI	Max. SI	Dev. SI	Av. OCEAN Values	Dev. OCEAN Values	Sum. Dev.
